SUMMARY

Software Developer with over one year of experience in designing, developing, and deploying web applications. Proficient in utilizing modern technologies such as JavaScript, React, Node.js, and Spring Boot to create responsive and user-friendly interfaces

EDUCATION

Master of Science in Computer Science
[University of Illinois, Springfield, IL](#)

August 2022 – December 2023

Bachelor of Technology in Computer Science & Engineering
[SRM University, AP](#)

June 2018 – June 2022

TECHNICAL SKILLS

- **Languages:** Java, JavaScript, Python
- **Databases:** MySQL, Oracle DB, MongoDB, SQL Server
- **Front-End Technologies:** HTML, CSS, Bootstrap, jQuery React
- **Back-End Technologies:** Node JS, Spring Boot, Spring MVC, Core Java, REST API
- **Build and Test Tools:** Jest, Junit, Unit Testing, Jenkins
- **Version Control:** GIT, GitHub

PROFESSIONAL EXPERIENCE

Kube IT Inc.
[Software Developer](#)

Atlanta, GA
March 2024 – Present

- Crafted responsive user interfaces with **HTML5, CSS3, and Bootstrap** enhancing user engagement through intuitive design and interactive elements.
- Constructed reusable **React components** and employed **Redux** for efficient state management, decreasing code redundancy by 25% and improving maintainability.
- utilized **Spring Boot** to design and construct scalable **RESTful APIs** that ensures communication between client and server
- Cooperated in **Agile teams**, participating in **sprint planning** and **code reviews**, which resulted in a 50% increase in deployment frequency.
- Employed **Git and GitHub** for version control, improving code management efficiency and fostering seamless collaboration among team members.

University of Illinois
[Research Assistant](#)

Springfield, IL
Feb 2023 – Dec 2023

- Developed a **REST API** using **MongoDB** to store data from learning management systems.
- Implemented **MERN-Stack** web application to analyze data.
- Evaluated methods for demonstrating **GitHub** collaboration in a teaching environment.

PROJECTS

Portfolio website

- Developed a responsive portfolio website using **HTML5, CSS3, JavaScript** and **ReactJS**
- Integrated contact form with email functionality
- Developed custom **React hooks** to encapsulate reusable logic for form handling, API fetching, and animations

Library Management System

- Established a **Java**-based library management system, enhancing user experience through a streamlined interface, which increased user engagement.
- **Applied SQL database integration**, optimizing data retrieval processes, resulting in a 40% reduction in query response time.
- Designed and executed **unit tests**, achieving a defect rate, thereby ensuring high-quality code and system reliability.

CERTIFICATIONS

- Oracle Databases Associate - Oracle
- Completed The Complete Java Certification – Udemy.
- Acquired skills in Programming with Java – HackerRank.
